Professional Experience

ALEPHOO

Full Stack Developer

September 2022 - Present

Remote / On-site

- Development of custom web solutions and applications using PHP (CodeIgniter), JavaScript, HTML5, and CSS, participating throughout the full development lifecycle from analysis to deployment.
- End-to-end management of infrastructure and production deployments on AWS, working with **EC2, CloudWatch, ECS, Amplify, and Lambda**.
- Implementation of RESTful APIs using JSON for system integrations and development of concurrent backend services in Go (Golang).
- **Applied AI integration and development, including the definition and use of specifications (specs), skills, and related tools to enhance system capabilities and automation.**
- Advanced database management, query design, and optimization using MySQL and MariaDB.
- Version control using Git (GitHub/GitLab), conflict resolution, software testing with PHPUnit, and participation in code reviews.

MOONPIXEL

Full Stack Developer / Founder

September 2025 - Present

Remote

- Development and architecture of complete web solutions (frontend and backend) for clients, covering the process from initial technical requirements gathering to post-production maintenance.
- **Development of frontend interfaces and applications using TypeScript and Angular.**
- Integration of custom business logic with third-party services and payment gateways.
- Configuration of hosting environments (VPS, Netlify), production deployments, domain/DNS management, and continuous performance and UX optimization.
- **Backend and API development using Java with Spring Boot.**

Education

Information Systems Engineering

2nd year completed

UTN Facultad Regional Delta

Campana, Buenos Aires, Argentina

Technical Skills

Languages & Frameworks

PHP (CodeIgniter 3), Go (Golang), TypeScript, Node.js, JavaScript, Vue.js, Angular, HTML5, CSS, Java, Spring Boot

Cloud & Infrastructure

AWS (EC2, CloudWatch, ECS, Amplify, Lambda), VPS, DNS

Applied AI

AI integrations and development, use of Specs and Skills

Databases

MySQL, MariaDB, PostgreSQL

Tools & Practices

Git, REST APIs, SOLID principles, Clean Code, PHPUnit (basic TDD, mocks)

Languages

Spanish Native

English Intermediate B1 (Technical reading and basic professional communication)

Featured Projects

Gestion Mascotas (SaaS)

Full Stack development of a multi-tenant platform for comprehensive veterinary clinic management, including patients, appointments, and clinical records. Infrastructure configuration and production deployment.
